Grade 4 Reading Comprehension Worksheet

Raggedy Ann Learns a Lesson

By Johnny Gruelle

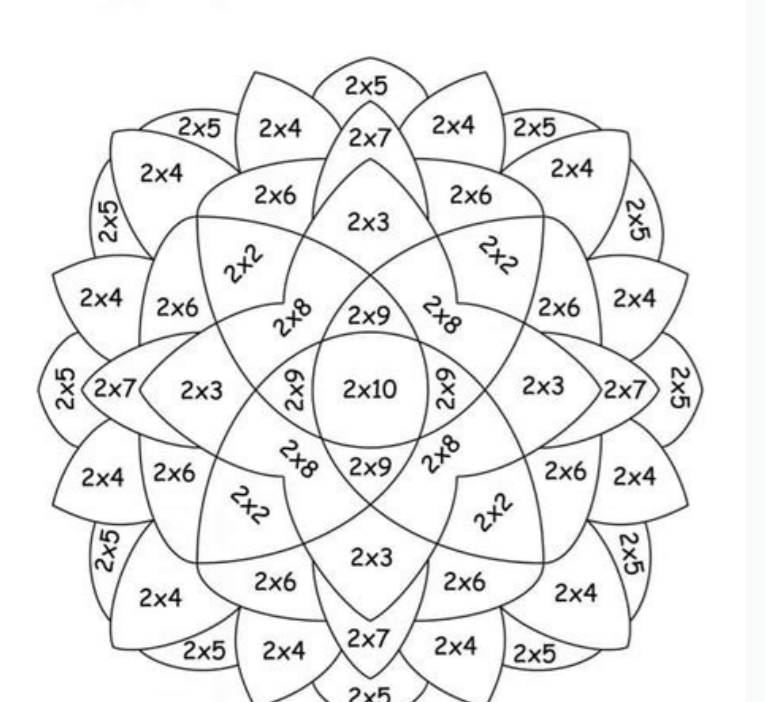

Read the story. Then answer the questions.

One day the dolls were left all to themselves. Their little mistress had placed them and told them to be nice children while she was away. And when the front gate clicked and the dollies knew they were alone in the house, they all scrambled to their feet. "Let's all go in search of something to eat!" cried all the dollies. "When Mistress had me out this morning," said Raggedy Ann, "She carried me the back of the house and I smelled as if it would taste delicious!" The dollies followed to the pantry door. They pushed and pulled, the door remained tightly closed. Raggedy Ann said: "I have it!" And she caught up the Jumping Jack, and the Jack unlocked the door. They swarmed upon the pantry shelves and spilled a pitcher of cream. A jar of raspberry jam was overturned and the dollies ate of this, when they heard the click of the front gate, they back to their room as fast as they could. "This is funny!" cried Mistress. "Why Raggedy Ann, you are all sticky! You've been in the pantry and all the others, too!" Then she picked up all the sticky dolls; she had scrubbed them with a scrubbing brush. Then she hung them all out on the clothes-line to dry. Late in the afternoon the little mistress placed them about the table. They had lemonade with grape jelly in it, after the dinner, the dollies were taken in the house. Then Raggedy Ann said: Our mistress gave us the nice dinner to teach us a lesson. She wished us to know that we could have had all the goodies we wished, if we had behaved ourselves."

Answer each question.

1. What did happen when all the dolls were left alone to themselves?
2. What the dolls did in the pantry?
3. Why the little Mistress was angry?
4. What did the Mistress do with the dolls?
5. What did Raggedy Ann say to other dollies?

Logic Problem #5

Use the table to help you solve the logic problem. Each square represents a possible answer. Follow the rows and columns to find the correct combination. Draw a dot in a square for the answer where the vertical and horizontal squares meet. Draw an "x" in a square that isn't the answer.

	Bagel	Toast	Biscuit	Muffin	Jelly	Peanut Butter	Cream Cheese	Butter
Mom								
Dad								
Joshua								
Jessica								
Jelly								
Peanut Butter								
Cream Cheese								
Butter								

The Tackart family went out to breakfast: Mom, dad, Joshua and Jessica. They each got a side with their meal: toast, a muffin, bagel and biscuit. Each family member put something different on their side: butter, cream cheese, jelly and peanut butter. Use the clues to find out which family member ate which side and topping.

1. Joshua enjoyed peanut butter as his topping.
2. Mom did not have a muffin or biscuit as her side but she did have cream cheese.
3. Dad ate a muffin but did not have butter as the topping.
4. The person who had a biscuit, had butter as the topping.
5. The toast did not have cream cheese.

Fill in the blanks below with words from this box:

evaporation	sunny	precipitate	condenses
evaporates	clouds	vapor	atmosphere
heating	heavy	oceans	lakes
droplets	plants	hail	glaciers
runoff	snow	cycle	crystals
rain	ivers	streams	

**Evaporation**  
On a warm, \_\_\_\_\_ day, water in a glass of water seems to slowly disappear. This is because the energy from the sun is \_\_\_\_\_ the water up and turning the liquid water into water \_\_\_\_\_. This process is called \_\_\_\_\_. When the water \_\_\_\_\_, it becomes an invisible gas in the \_\_\_\_\_. Evaporation takes place all over the earth, but especially in the \_\_\_\_\_ and \_\_\_\_\_ where there is lots of water.

**Condensation**  
As the water vapor rises, it cools off and \_\_\_\_\_ into water \_\_\_\_\_. If the water vapor becomes extremely cold, it will form ice \_\_\_\_\_ instead of water droplets. As the water droplets or ice crystals grow bigger and more numerous, they form \_\_\_\_\_.

**Precipitation**  
If water droplets or ice crystals become too \_\_\_\_\_, they can't stay in the air. They \_\_\_\_\_. Water droplets precipitate as \_\_\_\_\_ and ice crystals precipitate as \_\_\_\_\_. Sometimes, the rain freezes before it hits the earth and precipitates as \_\_\_\_\_.

**Runoff**  
This precipitation gathers into \_\_\_\_\_ and \_\_\_\_\_ that flow down to the lakes and oceans. This is called \_\_\_\_\_. Not all of the water makes it back to the oceans and lakes right away. Some of it is used by animals and \_\_\_\_\_. Some is frozen into \_\_\_\_\_. Eventually, the animals and plants breathe the water out and the glaciers melt, releasing the water back into the water \_\_\_\_\_.

Answer questions carefully give them more time on the next problem as a reward. Also, get all the latest advice and ideas for teaching when you subscribe to our free newsletters! (Expert players will use rounding to determine which numbers to choose later!) Find out more: the teacher at Polo 13. They build the numbers on the work sheet included to obtain the total. The game continues until all numbers are marked. At the beginning, they will only be guessed, but in the end they will begin to see a scheme emerge. Find out more: Games 4 gains/decimal of playing cards 10. Introduce models asking: "What do you notice?" Arrange a model problem and ask the students to write that they notice on sticky notes. Children can draw individual objects divided to represent the fractions or be more creative. If they do it well, they place an indicator on the free press card. Repeat! Find out more: Tales From A Fourth Grade Math Nut 12. (See more interesting ways to use dominoes for fraction games at the link.) Discover more: room 17 of Runde. Once you find, they must also convert the measurement within the same system (such as thumbs on foot). Collect and talk about the notes to see that they are useful to find the right number to adapt to the model. Roll to win the value of the Yahtzee place cards of Place of Place include differentiated versions for various skills levels. Yes, with a coherent practice using great mathematics mathematics solutions, you can get better votes in the exams. Find out more: Family Math Night 5. Discover more: education.com 6. Train children for decimal practice eliminates the math students of fourth grade and move by assigning them numbers. I can get better votes in the exams that practice mathematics solutions of elementary school ideas? Take a look at the best 4th degree scientific experiments and activities.
